ET-PP Coordination Meeting

M. Martínez

3rd October 2022

News

- Pre-financing was distributed to all the partners with the model we discussed last time
    - 60% of pre-financing distributed to all partners
    - 40% will be provided once the reports of the 12 months activities are provided to the coordinator
    - All partners with pre-financing < 20k€ received 100% already now
    - An effort was made to provide EGO more (80k€)

- We plan to consult in 6 months time to the partners the status in the execution of the funds

- We distributed the Collaborative Agreement v0.0 to the national representatives & administrators → collecting comments until 6th October before producing the v1.0
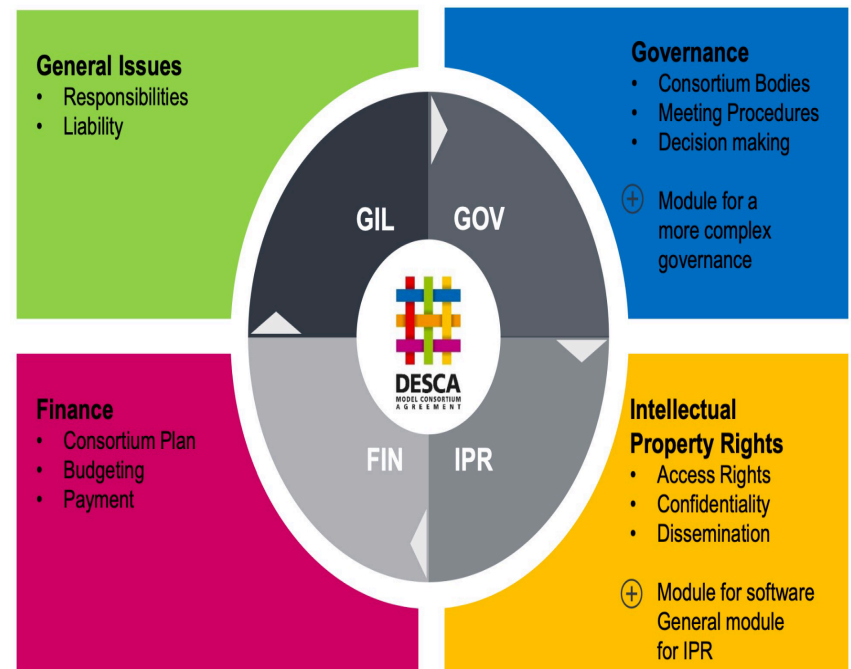

Collaborative Agreement

• Since we are following the Horizon Europe proposed template ([DESCA model](#)) I do not expect controversy but I am sure we will need to iterate

→ This document includes the description of the funding profile and schedule of payments

→ This document describes how the ET-PP governance will be organized

→ Intellectual Property Rights

Summary of the Consortium Agreement (CA) - <mark>**Use of DESCA model and inspired by other agreements**</mark>

Consult your administrator or get the v0.0 from INDICO and comment on it if needed

I would like to dedicate next meeting to it together with WP2 & WP9 report

Other notes

- Please consider we need to include all the relevant information in the ET-PP web
  - Including ads for contracts financed by ET-PP funds
- We generated a number of e-mail addresses:
  - etppall@ifae.es → all hands
  - etppadmin@ifae.es → administration
  - etppwp@ifae.es → WP coordinators only
- Workshop on Sustainability 17th – 18th Nov @ EGO
- Reports from WP8 – WP10 today

ET-PP WP1 Deliverables

- EC will ask us to have by **February 2023**
  - D1.1 Dissemination and exploitation plan
  - D1.2 Data Management Plan (DMP)
- Note this is not the ET DMP ..it is limited to ET-PP but I am sure we need to have a dedicated discussion on it.
  - ET-PP web
  - ET-PP indico
  - Data repository (EGO TDS… public enough ?)
  - Need for doc editing tools ? Can we agree in a single one ?
  - Alternatively we can explore other CERN-based solutions
- We shall work on this in the following months in coordination with WP8 and WP10
  - I would like to have this discussion in two weeks from now
