

Repository of Outreach Materials for ET

Livia Conti (INFN), Isabel Cordero Carrion (UV/IFAE), Gary Hemming (EGO),
Yuliya Hoika (UW), Magda Jakubiak (UW), Sascha Rieger (AEI)

REPOSITORY OF OUTREACH MATERIALS FOR ET

- **Creation of a centralised repository in the ET TDS**

The base requirement was the development of a functional and user-friendly digital space where visual and multimedia materials related to ET can be stored, managed, and accessed by members of the ET Consortium.

The ET TDS is a sustainable long-term solution which is already embedded in the ET infrastructure and familiar to large parts of the community.

The D10.4 ET-PP Report was submitted in August 2025 and accepted.

IMPLEMENTATION: OUTREACH FILES

■ Adding material

A new content type “Outreach Material” was established in the TDS system.

The following dedicated information can be attached to an “Outreach Material” file:

- copyright information including credits, authors, licenses & use restrictions
- captions & descriptions
- available language versions
- thumbnail previews for images

IMPLEMENTATION: USER FEATURES

■ Navigation all outreach files list

A new icon has been added to the TDS main navigation (right-hand side).

This opens a list of all outreach content, including information on:

- Credits & authors, licenses & restrictions, descriptions, available languages and thumbnail previews, file type.
- filter options by file type, access level and language
- full text search in all fields

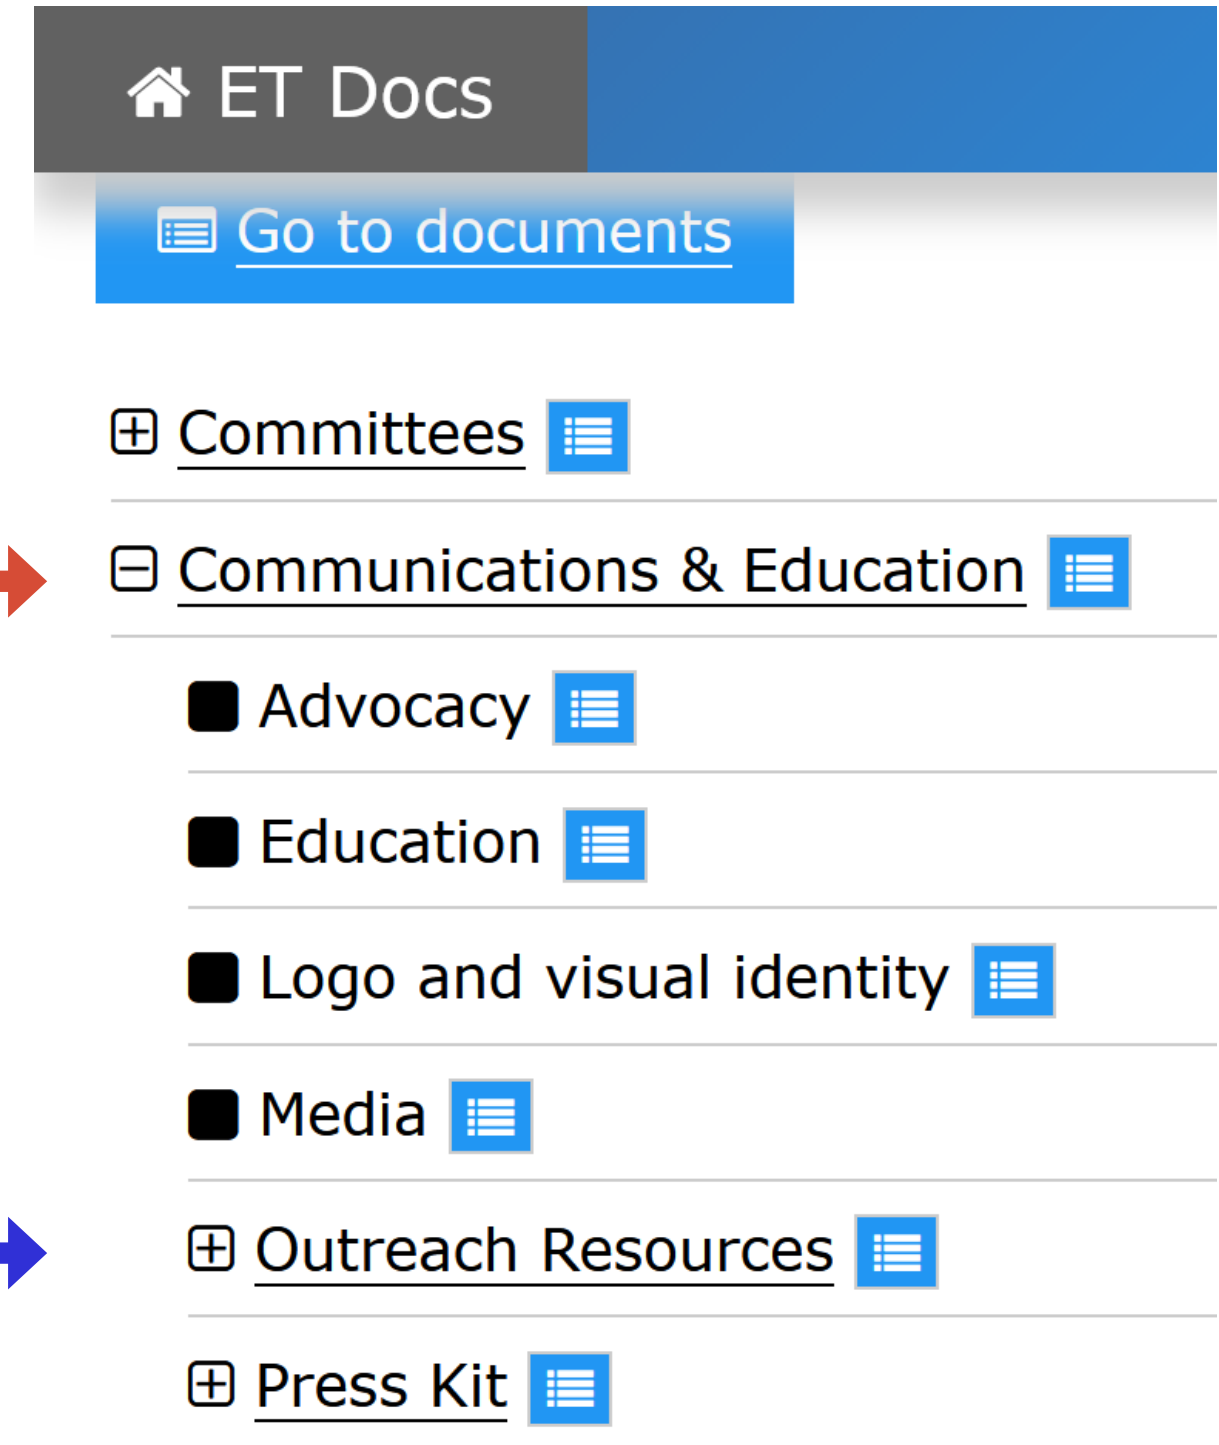

Thumbnail	Document Code	Access Level	Title	Credits & Authors	Licenses & Restrictions	Captions & Descriptions	Languages	File Types	Publication Date	View
	ET-0135A-26	ET PUBLIC	Infographics Fundamental Physics with ET - chapter 1 of the ET Blue Book: The	Livia Conti, Isabel Cordero @FuturaConjetura,...	Free to use for non-commercial purposes with the...	Here are presented 10 different infographics...	EN	JPG	2026-02-27	View

IMPLEMENTATION: USER FEATURES

■ Navigation by series: Top level

A new top-level section (series) “**Communications & Education**” has been added.

This contains [Outreach Resources](#), Press Kit and Logo & visual identity sections (+ others for future use).

IMPLEMENTATION: USER FEATURES

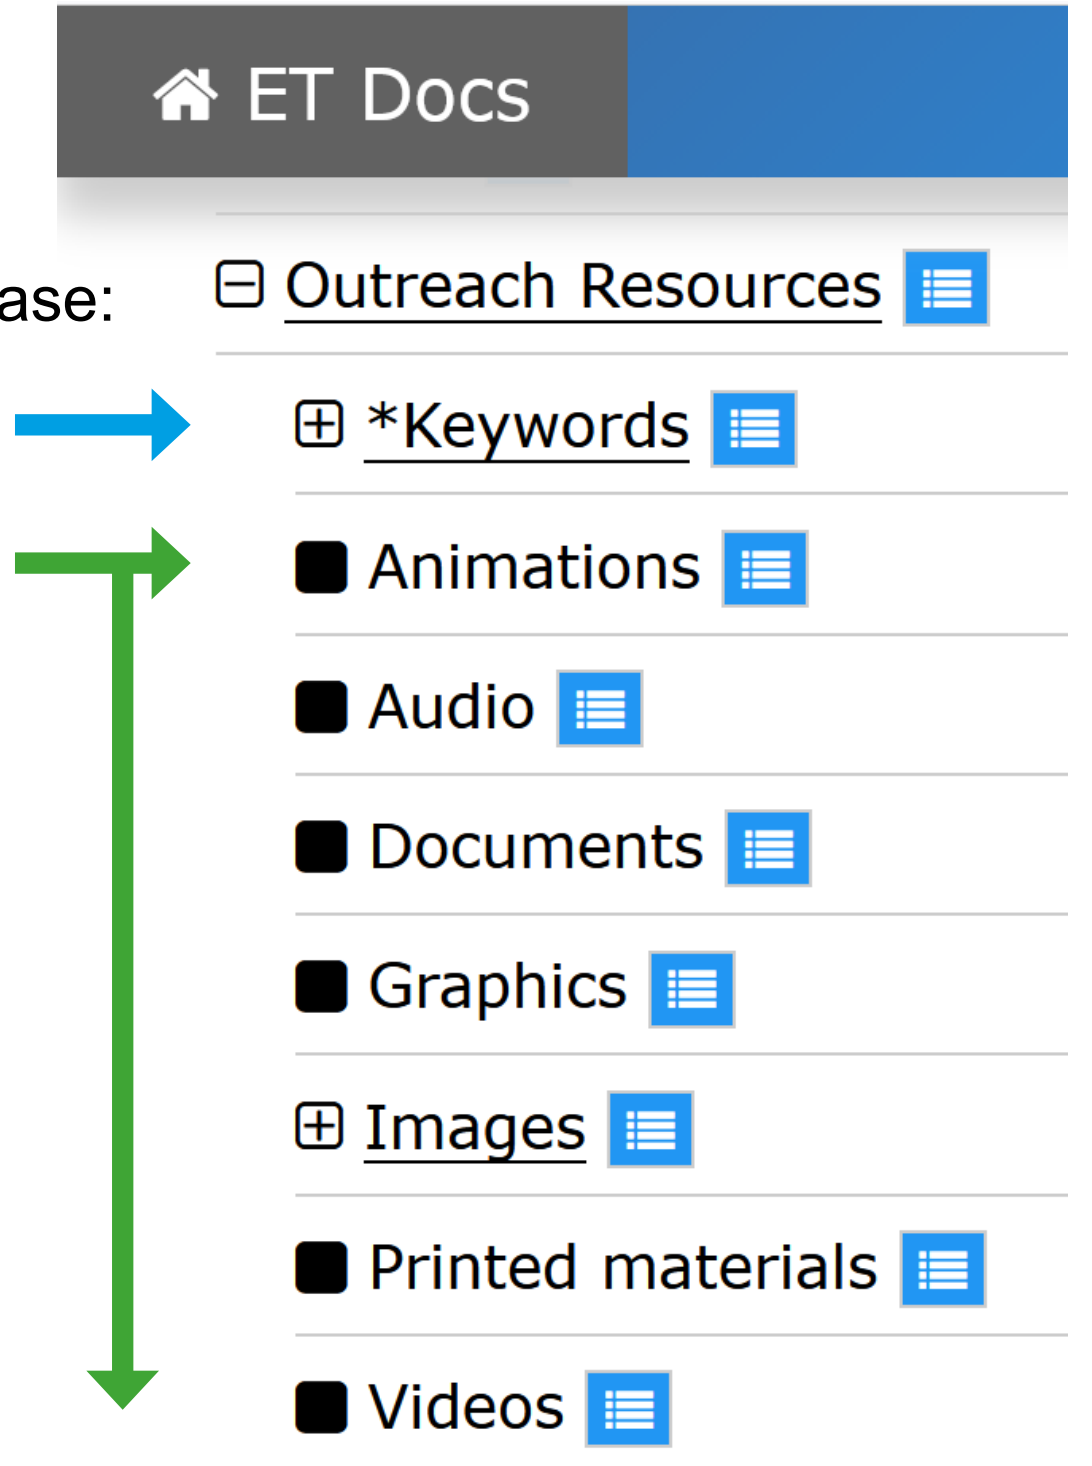

■ Navigation by series: Keywords and File Types

The Outreach Resources section contains the following nodes (subsections) on release:

- [Keywords](#)

- [File types:](#)

Animations, Audio, Documents, Graphics, Images, Printed Material, Videos.

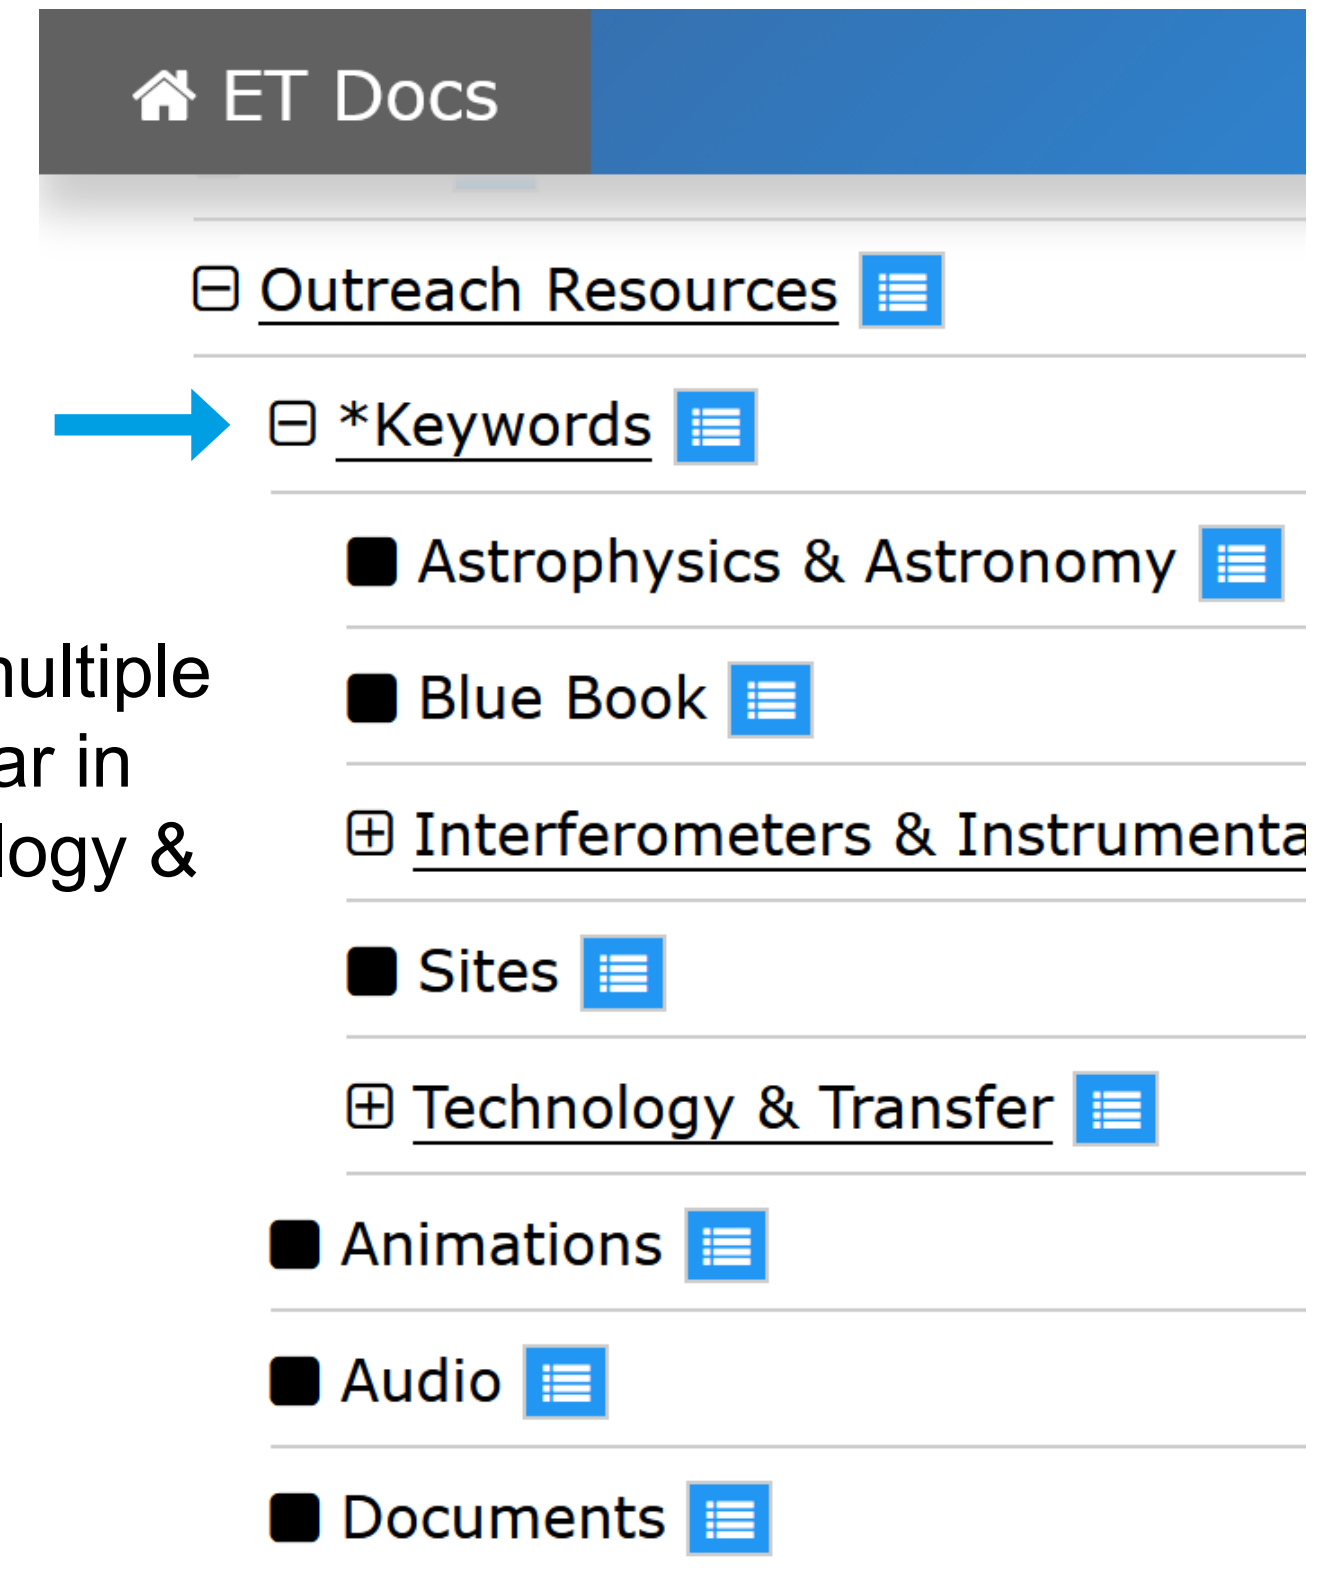

IMPLEMENTATION: USER FEATURES

■ Navigation by series: Keywords & multiple file attributions

The [Keywords section](#) contains the following nodes: Astrophysics & Astronomy, Blue Book, Interferometers & Instrumentation, Sites, Technology Transfer.

Note: A file can be assigned to multiple series and thus be listed in multiple sections. For example, an image of a laser can be assigned to appear in the sections Images, Interferometers & Instrumentation, and Technology & Transfer.

Additional series may be created as appropriate at any time.

COLLECTING MATERIALS

■ Aggregation of ET outreach materials

Resources hosted in the Outreach Repository are not yet comprehensive. The Italian ET and EMR ET groups have given permission for their material to be hosted, but other stakeholders need to be approached (again).

The infographics and translations produced in the second component of D10.4 will also be hosted in the Outreach Repository
